ALKALINE & HYDROGEN WATER GENERATOR

Built on 35 years of study on science for health of mankind

Experiencing a barley hump during my childhood, I promised to myself to be an adult who can help people suffering from hunger. After I grew up, hunger was not the problem. Instead, chronic and incurable diseases threatening lives, such as diabetes, high blood pressure, and cancer, were the main issues. Then, I entered the fields of Naturopathic Medicine, studying 'Orthomolecular Medicine' written by Linus Pauling, who won two Nobel Prizes. In the process, I realized the importance of water and pursued the fields of water science for 36 years. There were ceaseless efforts and passion to come to the top my profession.
